

Name _____ Date _____ Block _____

Directions: Answer all questions in complete sentences.

1. What did you learn today in this lab?

2. What had the most density/volume?

3. Do you think this is a reliable way to measure?

4. How does your "guess" about the density compare to the actual density? Do you think it is precise and/or accurate? Explain.

5. Was there a time period where this would have been a reliable way of measuring density? Is there a better method today? Explain.
